AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0023] as follows:

[0023] Consider a test harness written in ~~Java~~ JAVA™ (hereinafter referred to as "Java") that has over 450 modules and includes over 850 paths. Suppose one method, dependencyExists, is modified. The original method reads as follows:

```
private boolean dependencyExists(String content) {
        String lower = content.toLowerCase();
        if (lower.startsWith("#prev") ||
        lower.startsWith("#entry"))
{
                return true;
        }
        return false;
}
```
